

CUT GROOVED PIPE

AS-CG- SUPPORTING THE INDUSTRY'S CONNECTIONS RANGE

CUT GROOVE PIPE

AS-CG is one of the many industry connections that we offer to support a wide range of installations.

The precision-engineered design and manufacture of Cut Grooved piping ensures a secure connection, safeguarding against leaks that can lead to workplace accidents or costly downtime.

Cut Grooving, whilst fairly simple in its design, can be difficult to achieve the required tolerances to ensure a seal dependant on the specific raw material being used and the process adopted for cutting the grooves.

Allegiant Solutions' Cut Grooved piping material is manufactured to our tight tolerance specifications and having developed specific manufacturing processes and using CNC lathes to machine the groove ensures our Cut Grooved products are conforming 100% of the time.

KEY BENEFITS

- **Fast installation** - the rapid assembly process of grooved piping accelerates project timelines
- **Labour cost reduction** - Unlike flanged spools, installation of Cut Grooved piping requires less labour and significantly cuts down installation time
- **Best in Class** our material selection and in-house manufacturing processes go above and beyond the standard outlined by all Cut Groove coupling OEM's. Allegiant's Cut Grooved products are supplied to tight tolerances not only on the groove but also on the length of the product so that you can be assured you have a reliable product for your project everytime.
- **Full Traceability** - every product is fully traceable with material heat certificates and gauging data supplied.
- **Increased production time**- bring your projects online faster with a product you can absolutely trust
- **Safe, reliable and cost-effective**

APPLICATIONS

- **Backfill Reticulation**
- **Water Reticulation**
- **Slurry Lines**
